"Americans Come To Me".

George Bernard Shaw, whose pungent wit has enlivened the world's stage, is seen here in a recent photograph. He arrived at San Francisco recently, denied he had ever said he would never visit America.

"What I said," the Irish dramatist remarked, "was there was no need for me to visit America, as all interesting Americans come to see me."

That this was true is proved by the picture, for here in the Mayor's lounge of the 42,500 ton liner, he is seen with Mayor Angelo Rossi who not only went to Shaw, but dressed himself in his cutaway and wore a carnation.

NOW ON THE SOUTH ROAD,

Between Peters' and Kuley's

The Komical Kraut Kompany

"Standing room only" was the order of the evening at Modest hall Monday, when the town band had run off a few marches and the curtain had rung up for the first act of the farce-comedy "Now Adolf."

Whoever picked the players for the play did a good job, but the one who picked the play for the players, particularly those in the two leading roles, did an excellent piece of work. Adolph Kramsonmiller, the part taken by Clarence Anderson, was exceptionally good; but who'd ever thought that, parked away out of sight for years in an auto repair shop, was one who could give such a fine portrayal of a Dutch comedian as could Bill Barth? The audience had come with the intention of being pleased, and each sally was greeted with gusts of laughter. The manager is arranging to put it on here again before putting it on the road.

Carl Comes a Cropper.

Carl Grueskopf, who has a farm in Brightbank district and is fairly well known in town, has had his P.O. address changed to Fort Sask'n, with the probability of that being his home for the next 7 or 8 months.

Herr Carl had been suspected by the R.C.M.P. of violating a clause in the Excise Act by operating an illicit still. On pleading guilty to the charge when brought before Magistrate McLeod, a penalty of \$400 and one month in addition, was imposed. Failure to pay the fine brings an 8 months gaol term.

Liquor experts claim that "Carl's Special" was a high-class product. This is probably true, as he is on record as being "a graduate in chemistry from a German university."

Carl was no jam-pail artist with a ten-candle-power kerosene outfit, but manufactured his liquor in 50-gallon lots, with two heaters, condensers, and numerous filters, screens etc.

Herr Carl claimed that in making his "No. 2" he used a secret process which eliminated the yell and squeals from the amber fluid when it was consumed in town by his patrons. While this may be true, there remains the point on which he apparently fell down, and this was that he failed to eliminate the odor of the "mash" when being cooked, as it was due to this clue that Corp. Cameron's search party located the place of manufacture.

Another distiller's secret which the Amiable Carl is said to have prided himself on was his "aging" process: as he is said to have been able to give, on a hurried call "5-year-old" stuff in about a quarter-hour; but for "ten-year-old" liquor it took upwards of an hour to "age."

The Edmonton authorities say that, applying his knowledge of chemistry, the Brightbank chemistry graduate turned out a liquor product from his high class still which rivalled the goods sold over the counters of the G. L. C. B.'s stores.

The Jig-Saw Puzzle Of Life.

Have you participated in the prevailing rage or fad of these latter days of the depression—the jig-saw puzzle?

If so, what did you get out of it? A few idle hours of lazy enjoyment as you sorted out the many and variegated colored pieces, cut in all their fantastic shapes, and sought to fit them together? Is that all you got for your money, your time, your latent concentration? If so, it was largely waste, and you would have been better employed in reading, or some light occupation, or even lying down in quiet and complete relaxation.

Or did you, as your fingers played with the fascinating bits of colored cardboard and you placed them together until out of a jumble of colors the design of the artist began to emerge into a thing of beauty, allow your thoughts full sway, and even study your own reactions to the comparatively idle task in which you were engaged?

For example, as hour after hour slipped by while you selected this piece and that and manoeuvred them about the table, endeavoring to make them fit where it seemed they ought to fit, but would not, did you become more and more impatient, or were you actually and truly developing what has become to many people—the lost art of patience? The question is: Did indulgence in this jig-saw pastime strengthen or weaken your will power to cope with the real puzzles which life itself presents?

Did working over the jig-saw suggest anything else to you? Did your employment in this form of recreation for tired bodies and troubled minds, lead to more serious thought, to a contemplation of the complications of life, the consolations of life, and, as you finally solved the puzzle, the rewards and the beauty of life? Did you pause in contemplation of your own life, and give some heed to the pattern you were weaving out of the many pieces under your control to make it a thing of beauty, or mar it with ugliness?

A well-known author, writing in the current issue of a popular magazine, tells how she spent most of the night working over one of these intricate jig-saw puzzles. As she worked well into the small hours, the pattern of the puzzle continued to elude all her efforts; she could not make the design come together. It persistently lacked both coherence and purpose. She became discouraged as the hours went by, growing both impatient and impatient, until, at last, in extreme desperation, she laid one improbable piece against the other one, and brushed aside those sections she had nearly completed.

Having almost given up hope of successfully solving the puzzle, she saw a certain inoffensive fragment of it to one side of the table. It was a tiny piece, and yet, when she had fitted it into the puzzle, her difficulties suddenly vanished. For that tiny fragment held the necessary clue to the puzzle's color and line. Set in its place, the pattern became clear and the design stood out in bold, brave fashion. In fact, in a very short time the jig-saw puzzle had ceased to be a puzzle; it had become a picture.

Surveying the finished picture, this author said to herself: "Life is pretty much like this. It is a mass of irregular, jagged pieces until we are able to find the secret of it. It seems absolutely without meaning until we've located the key piece."

The key piece—it is all important whether in working out the solution of a jig-saw puzzle or of that still more intricate pattern of our lives. As the lady we have quoted further says, many of us work doggedly through the long darkness over the jig-saw puzzle called life. Often our profitless labor carries us well into the dawn, until we meet that hour when vitality is at its lowest ebb. We are prone at this time to grow confused and inaccurate, tearing up the bits that we have put in order, trying to fit impossible sections together in a foolish manner.

This is a dangerous period in our lives—in the lives not only of individuals, but of communities and states. It is then we are inclined to engage in rash experiments, to forsake all the groundwork and experience of the past. We do not always realize that we are discouraged and confused because the key piece is missing. But it is there, and invariably, even though that piece has long eluded us, we will find it—if we have patience and vision. It is not the part of wisdom to destroy the whole picture, but to continue to hunt for the missing piece—the key piece—that will serve to point out where other pieces have been misplaced, where additional pieces should be placed, until the whole stands out strong and splendidly completed.

And here is the greatest and kindest truth in the whole world—that the key piece is usually a little thing that lies close at hand! This is true in a jig-saw puzzle employed to pass an idle hour; it is true of the key-stone of a great and beautiful building; it is true in life itself no matter how complicated and tangled it may seem.

As you work over your jig-saw puzzles, of what are you thinking? What are you making, what do you intend to make, of the all-important jig-saw puzzle of your own life?

Unlooked For Discovery

Tests At Cornell University Indicate Diet May Cause Heart Trouble
An unlooked for discovery that diet may cause heart disease comes to light with the death of "Depression," the prize synthetic diet goat of Cornell University.

Apparently in perfect vigor, "Depression" had excited a few days ago and dropped dead. Autopsy showed death due to degenerated heart muscle, in the ventricle.

"Depression," moreover, was the sixth goat fed on the synthetic diet, and all the others died of heart disease. This was a 100 per cent record for whatever caused the fatal diet deficiency.

The diet substitutes cellulose for hay. It includes starch, casein, the solid part of milk, various mineral salts, yeast and cod liver oil. It is fed to goats and other animals in the Department of Animal Nutrition under direction of Dr. L. A. Maynard and Dr. C. M. McCay. The object was to discover the food factors best for animals.

Depression was 10 months old, the first herbivorous animal in history to live any length of time on synthetic "hay." His age brought home the significance of the diet heart complex.

Whether there may be human lesions in the heart diet factor is not known. In view of the fact that heart troubles cause more than twice as many deaths annually in the United States as the next most fatal disease, cancer, scientists regard the goat experiment with interest.

National Dairy Council

Allan C. Fraser, Of Calgary, Is Appointed Secretary-Treasurer
Allan C. Fraser, well-known Calgary agriculturist, has been named secretary-treasurer of the National Dairy Council of Canada, succeeding W. F. Stephen, of Ottawa. Announcement followed the close of the two-day annual meeting of the council at Toronto.

W. H. Forster, of Hamilton, and P. C. Colquhoun, of Maple Creek, Sask., were returned as president and vice-president, respectively.

Feature of the annual meeting was the amendment to the constitution providing equal representation on the executive for producers and manufacturers. The latter had previously enjoyed two-thirds representation on the board. The number of voting delegates on the council was reduced from 33 to 18.

Producers named their executive members as follows: P. C. Colquhoun, of Maple Creek, Sask.; Norman Christie, of Didsbury, Alberta; R. V. Hurford, of Courtney, B.C.; Hector Cullen, of Truro, N.S.; and W. L. Carr, of Huntingdon, Que.

Manufacturers' representatives on the executive are: Col. C. B. Price, of Montreal; W. H. Forster, of Hamilton; Robert Barbour, of Yorkton, Sask.; J. M. Carruthers, of Winnipeg; and W. G. Marritt, of Toronto.

Appointment of Mr. Fraser to succeed Mr. Stephen will take effect on the latter's 70th birthday, May 28.

Debate Via Radio

Speakers in Edmonton, Saskatoon and Winnipeg In Consecutive Discourse

The recent radio debate between representatives of the University of Alberta and the University of Manitoba was the first in local history and the third in a series. It was unique in that the public, listening in, heard speakers in Edmonton, Winnipeg and Saskatoon, in consecutive discourse without a hitch or mechanical difficulty.

Telephone wires connected the three stations; and four times during the broadcast the flow of sound between Edmonton and Winnipeg, and from there to Saskatoon, was changed by reversing the repeaters. This operation, requiring thirty seconds each time, was accomplished so smoothly that the public was unaware of it. And as a flourish of mechanical perfection, the Saskatoon station broadcast music, while the speakers were arriving at their decision, which was heard by receivers tuning in on all three stations.

Such types of broadcasting are passing the stage of "stunting," since they reach the public completely and clearly. It is another indication of the possibilities becoming apparent in radio, of a serious and thought-provoking character: Winnipeg Free Press.

Bear Rugs Are Cheap

Some Selling At The Pas For Only Ten Dollars

Fur rugs for floor covering are coming back into style as the result of low prices for skins. Making of bear rugs and the mounting of heads and paws and claws has developed into quite an industry at The Pas. Little white bear rugs, a novelty of the Churchill country, sell as low as \$10. Little black bear rugs may be had for even less. A nice big polar bear rug is worth \$75. Black timber wolves run up to \$20.

Another Aid For Aviators.

With the aid of radio apparatus it is now possible to take off at an airport, climb up through fog and storms and then, without once seeing the ground, to fly hundreds of miles to a certain destination, come down without seeing the ground and make a perfectly safe and normal landing.

FASHION HINT

"How to make my old short skirts conform to the new length; how to make my old dress look like a new one. I dropped the hints, and as the part that had been turned under was darker than the rest, I relined the entire dress, after having bleached the goods, followed directions in the Diamond Dyes package."

"I used Diamond Dyes for the re-dyeing, of course. I have dyed many problems to me until I hit on this plan. They have saved me many dollars and have never failed to give perfect results—smooth, even, vibrant colors. They have washed and friends think my things are new when I redeye or tint them with Diamond Dyes. They do give the most gorgeous colors!"
Mrs. G.C. Lewis, Quebec

Helps With Inventions

Wife Of Noted Inventor Gives Him Valuable Assistance

Mrs. Alice Mary Herbert, Russell Brown, who announces in the "London Gazette" that she intends to assume the Christian names of her husband, Mr. Sydney George Brown, writes, "I am a most able lady, who has taken a leading part in developing her husband's amazing electrical and gyroscopic inventions. These have won him many distinctions. He is one of the greatest and most prolific inventors of modern times. By means of one of his inventions the Flying Corps first received wireless messages on airships and aeroplanes and his gyroscopic compass is one of the most interesting marine devices of the age."

An International Preacher

Has Church In Canada and Also In United States

With a church in British Columbia and another in Alaska, Rev. Frank H. Bushfield, formerly of Winnipeg, can claim to be working out church unity on an international scale. One congregation worships in the United Church of Canada at Stewart, B.C., and the other, the Methodist Episcopal Church of United States, at Ryder, Alaska. Mr. Bushfield belongs to the Prince Rupert Presbytery of the United Church. He is a graduate of Victoria College, Toronto, and has served in Alberta and Vancouver.

A Good Egg Story

A versatile hen of New Rochelle, New York, laid two eggs, one of which was battleshield grey and the other jet black. Then she laid an egg which was the color of the shell of Mrs. Michael Currell, the owner. The white one had a double yolk. The colored eggs are not broken, so the state of their interiors is not known.

Motorists Are Asking Outlet For Tourists

Seventeen Miles Now Limit For Driving Outside The Pas

Motorists of the thriving northern mining town of The Pas, are bitten with the wanderlust and yearn for new highways to conquer. The tired business man here who goes for a drive cannot travel far. Seventeen miles is his limit—to Clearwater Lake. Thus has arisen strong agitation for an outlet to the outside world, a project that would lay a 100-mile pathway through virgin wilderness to Hudson Bay Junction, in Saskatchewan.

A road of sorts to that point already exists but is not passable for much of the year. The road is graded has yet to be done. It is hoped to have this road opened up this summer and efforts are being made to have it graded as a relief measure. Motorists here have no opportunity to register high mileage figures on their speedometers. The traffic, made up of 80 automobiles and 35 trucks, occasionally gets into a jam owing to the restricted driving area.

The car driver has a choice of four highways at present. The road to Clearwater Lake, which is the longest, is the most popular. Two other roads stretch for three miles, the other highway measures but four.

Improving Wheat Section

Scientists Aim To Produce Same Quantity From Half The Acreage

Not the doubling of the wheat crop, but on the other hand producing the same quantity on half the acreage, and in that manner reducing the cost of production, is the aim of Dr. H. T. Gussow, Dominion botanist, who attended the conference of plant breeders, plant pathologists, and cereal chemists from Ottawa, and the western provinces held in Winnipeg.

Dr. Gussow said that while success is not yet achieved, his attainments appear within measurable distance, though several years' further research and experimentation will be needed before this aim can be said definitely to have been reached. Dr. Gussow's interests extend from the Atlantic to the Pacific, and his assistants all over Canada working on new or improved varieties of different plants. He is now making a tour of the west inspecting the results secured at different points.

Potato Exports Heavy

Heavy shipments of potatoes from Prince Edward Island are being received at Halifax over the lines of the Canadian National Railways and indicate a strong revival in the export business in this line from the Nova Scotia port. About 200 carloads in all have been looked for exports and steamers have been chartered to load full cargoes for southern ports.

The Marja, a fish that is plentiful in Lake Winnipeg, is sometimes called the fresh-water ling.

Headaches and Dizzy Spells Nerves In Bad Condition

Mr. Neil Crawford, Hamilton, Ont., writes: "My nerves were in such bad condition I found it almost impossible to get a good night's sleep. I was also bothered with headaches and dizzy spells."

"I tried many different remedies, but they did not seem to give me much relief, but after I had taken Milburn's Heart and Nerve Pills I could hardly believe the change they had made in my condition."

For sale at all drug and general stores; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Research Director Presents Many Striking Statistics To Indicate Upward Swing Of Wheat Prices

If history is to repeat itself, the all-time "low" in the price of wheat and probably of the general commodity price level has been reached.

This was the contention of Major H. G. L. Strange, director of the research department of the Senior Grain Co., Ltd., Winnipeg, who recently addressed a meeting of the general membership of the Regina Board of Trade.

Major Strange presented many striking statistics to indicate wheat should climb to 67 cents at country elevators as the surplus disappears. Major Strange based his contention of the all-time price level having been reached "on the fact that what is occurring today occurred following wars of other years," and also of the report that the index number of wholesale prices rose from 63.9 in February to 64.4 in March, according to a statement issued by the Dominion Bureau of Statistics.

Displaying a chart showing 500 years of wheat prices, collected by George Bromhall, eminent wheat statistician of Liverpool, England, the speaker said it could be noticed the price of wheat was ever fluctuating at its maximum level, but at three periods from 1400 to the present, the price fluctuated very violently, both up and down, in periods corresponding to the three great world-wide wars—the 30 years' war in Germany, the Napoleonic wars and the recent World War—each of them over 100 years apart.

"The length of time these fluctuations have taken to rise and fall have been substantially the same during each of the three wars. From the high price of wheat in the 30 years' war in Germany to the bottom of the decline was 11 years, in the Napoleonic wars it was 10 and one-half years, and in the autumn of 1931, the eleventh year after the high price of wheat in the Great War, the decline was arrested in British sterling at Liverpool," the speaker said.

The price of wheat will rise at the country elevator two or three cents as the pound and dollar come closer together, Major Strange continued, adding that 10 cents should be the general commodity price level rise back up to the pre-war level. It would also rise to the extent of the additional 26 cents a bushel, altogether to a price at the country elevator of 67 cents, should the surplus entirely disappear, the speaker claimed.

"I do not hesitate to say," Major Strange commented, "that all the economic forces, that impel themselves upon wheat are tending to push back the price to the 1913-14 level, but perhaps not higher."

Some of the "fallacies" people within the trade have felt obliged to oppose, the speaker said, were such as the wheat board, an excise tax on wheat for making bread in Canada, reduction of wheat acreage in Canada and other proposals to replace the present methods of handling and marketing grain in the Dominion.

"The futures system of marketing has been, and is being, violently attacked by those who favor a wheat board," the speaker continued, adding, "they carefully refrain, however, from explaining what a wheat board could do that the present system is not already doing. They speak vaguely of differentiating between returning the world's price of wheat and returning the world's value of wheat. A distinction absolutely impossible to define, because they are one and the same thing as far as money is concerned."

Some stated the futures system of marketing had no interest in discovering new markets and new uses for a wheat board or some other organization could do this, Major Strange continued.

"The fact is today that there are literally hundreds at work exploring every possible wheat market in the world to dispose of Canadian grain," the speaker said, "all experienced men, who are continually extolling the virtues of Canadian grain and endeavoring to promote its use."

"Much has been said about untapped markets for wheat in China.

This again is a fallacy," the speaker maintained. "The true facts are that China produces on the average twice as much wheat per year as does Canada, and in addition, four times the volume of rice that we do wheat in Canada, and that 430,000,000 people in China consume more cereals in the form of rice and wheat per head than do the people of Canada, so it is apparent there is not much evidence of starving millions and of unlimited markets. As a matter of fact, people in China are as well fed as we are. Starvation only occurs in certain districts with no communication, that suffer from drought and occasional great floods."

"It is often forgotten that wheat and other commodities can only be purchased by the people of a country in proportion that others are willing to purchase in turn their products or the goods they manufacture," Major Strange added. "The Chinese market for our wheat and other goods will expand as we or the other people in the world are willing to purchase Chinese products and goods. Money as such, hardly enters into the question at all."

Reduction of wheat acreage by exporting countries by common agreement, would make European buyers suspicious, Major Strange contended, and they would tend to increase their own acreage and retain the tariffs and wheat quotas now existing.

By Ruth Rogers

GRACEFUL FOR THE MATRON

By Ruth Rogers

Decidedly chic and slimming. Delightfully becoming to the larger figure is dress of the type presented for today's pattern.

The smart rever neckline is particularly helpful feature to cut the bodice breadth.

The skirt panelled at the back with a bias yoke effect and vertical seam running down the center-front, are most slimming.

And how distinctive and smart you'll feel in this attractive navy blue crinkly crepe silk dress. For its trim, plain white crepe combined with a navy and white crepe print. Style No. 533 is designed for sizes 36, 38, 40, 42, 44 and 46 inches bust. Size 38 requires 3 1/2 yards 36-inch, with 1/2 yard 36-inch contrasting. Its small coat will amaze you.

Price of pattern 20 cents in stamps and coin (coin is preferred). Wrap color carefully.

Watching For Contraband Shipments Of Munitions

Close Check Ordered On Ships From B.C. To Orient

Customs officials at British Columbia airports have been ordered to make a close check for contraband shipments to the Orient during the next few weeks. Hostilities in Jehol and the prospect of prolonged fighting have increased the demand for war materials, and it is suspected that munitions have been sent across the Pacific in the guise of ordinary merchandise.

There is a good deal of smuggling going on, according to investigators. Five hundred rounds of ammunition were recently discovered on the liner "Empress of Japan." This was shipped in boxes labelled with a bogus description and would have passed through undetected had it not been for the customs officials' special vigilance.

Of course, there is no embargo on war materials leaving the country, provided they have been purchased in a legitimate way and all other legal procedure has been observed. For instance, the Japanese government recently completed purchase of a large quantity of steel track which has been lying idle at Port Mann ever since construction of the Canadian Northern Railway was suspended many years ago. This material will probably be used in the manufacture of munitions, but is considered a strictly business-like deal.

Consolidated Mining & Smelting Company at Trail is making regular shipments of zinc to the Orient and there is but little doubt that most of it is used in the making of shells.

Improving Nature

The chemical process used by nature to make coal from peat has been speeded up. What nature takes millions of years to do may be done by scientists in three months. A scientist in Cincinnati, O., has isolated the coal germ and with this bacteria can inoculate a peat bed so that it will turn into coal in a short time.

Demand for automobiles in Argentina in January was greater than the supply.

Benzol, an anti-knock for gasoline, is present in the waste gas of Turner Valley.

A New Process For Sprouting Grain To Turn It Quickly Into Fresh Fodder For Cattle

A Chinese Landlord

Cancelled Payment Of Back Rent Owed By Unemployed Man

Somewhere in the city of Halifax there is a Chinese landlord with more "heart" than some of the English members of the rent-collecting fraternity.

In the northwest end of the city there is a family, the head of which has been out of work for a considerable period of time, with the result that they are now long on accounts and short of cash.

They live in a flat rented to them by the Oriental laundryman, who, along with other creditors, has been waiting for his money for several months. He called several times for the money and noted that each time the condition of the family seemed to be getting worse.

He called again recently and handed the tenant an eviction notice. The father of the family took it with a sinking heart, expecting, on opening it, to find a notice of eviction, which would throw him and his loved ones out on the street.

After the departure of his Chinese landlord he slumped up courage enough to open the mislaid envelope to discover to his joy that it contained, not an eviction notice, but a receipted bill for the total of his back rent, amounting to more than \$150, wiping off the debt in its entirety.

Needless to say, any feelings of animosity that this particular family might have entertained toward the yellow race was eradicated by this act of unsolicited kindness.

Will Review Income

A review of local incomes received by pensioners "in the government service will be made, and if any are considered excessive, the salary, but not the pension will be reduced. This, it is intimated, was the position of the government as outlined by Mayor W. J. Stewart, of Toronto.

People of Vienna, Austria, are eating less food per person than a year ago.

BARRED SHAFTS OF WIT LOST G. B. S. ADMIRERS

The rapier-like wit for which he is famous was the cause of losing George Bernard Shaw, celebrated author and dramatist, two of his most ardent admirers during his recent visit to Hollywood. En route to San Pedro, Shaw stopped off at the movie capital to see at first hand how the great industry is operated. During a tour of the studios he was introduced to a number of famous film stars, and it was at these introductions that G.B.S. gave his well-known wit the work-out that lost him two notable fans. First, the visitor bluntly inquired of Alice Brady "why a girl with a nice face like yours wears a hat like that." That placed Miss Brady among the anti-Shawians, for while a woman will forgive many things, criticism of her clothes—her hat in particular—is not one of them. Shaw loosed his next barb when lovely Ann Harding was introduced. Miss Harding remarked that she was going to play in one of Shaw's plays, "Captain Brassbound's Conversion." Whereupon Shaw inquired where she had played the part previously. Miss Harding said, "a little town near Philadelphia," and was astonished when the dramatist announced: "I'm sure it must be a practical performance"—and as a practical performance is the production of a play without payment to, or permission of the author, Miss Harding retired to her room in tears.

A new process for sprouting grain within a few days so as to turn it into fresh fodder for cattle has been brought to the attention of German Carn experts by Dr. Spangenberg, who believes that it will revolutionize cattle breeding by permitting industrial manufacturing of fodder.

The new process proposed by Dr. Spangenberg and recently tested by the German Agricultural Society is briefly as follows: The grain that is to be sprouted is spread upon large perforated iron sheets or riddles in a layer of about one inch. The riddles in turn are placed into open wooden cases of the same size, so that they are resting in the middle of the cases. By pouring a liquid over the grain at regular intervals a rich growth of light green sprouts is produced which may be harvested after ten to fifteen days, when they have grown to height of about ten centimeters.

Dr. Spangenberg did not reveal the nature of the liquid used in his experiments and to which he attributes an especially quick growth of the sprouts and their—according to him—abnormally high nutritive value. Authorities on seed sprouting of the German Agricultural Society believe that this liquid is composed of phosphoric acid, potassium nitrate, potash and lime.

Similar mixtures have already been used for some time in experiments of this kind by the society. When testing the liquid applied by Dr. Spangenberg, the experts of the society applied at the same time their own mixture as well as pure water to other riddles, filled with grain. It was found that, as to the rapidity of growth, there was not much difference in the three cases.

The great advantage of this process is that it enables the farmer to introduce some variety into the menu of the cattle, especially in winter, when no fresh fodder is available. It, moreover, seems to have a beneficial effect on the milk production. Dr. Spangenberg maintains that tests in Lubeck have shown recently an increase of the milk production by 18 to 22 per cent. after feeding sprouts instead of grain only. Experts of the agricultural society, however, expressed some doubt as to the feasibility of fattening cattle, hogs and other animals by sprouting the grain.

This, they declared, could be achieved only at much greater cost, which, in view of the relatively small value of fresh meat, would not pay. The reason why it would be more expensive to fatten cattle by feeding them sprouts than by feeding them ordinary grain is simple. Quite aside from the cost of the liquid used to sprout grain, the process of sprouting leads to a loss of nutritive value, caused by the lack of sunlight and the resulting inability of the sprouts to accumulate carbohydric hydrogen. Instead, the sprouts, biologically speaking, do nothing but accumulate water, which builds up a larger body compared to the small grain out of which it is developed. The carbohydric hydrogen contained in various forms in the grain are broken up by the sprouting process of growing, and while the hydrogen is retained the carbon parts are emitted by the leaves in the form of carbonic acid.

The sprouts are therefore of real value chiefly to chicken farms and dairies where a permanent supply of fresh, green fodder is desirable and where the high value of the product warrants the additional expense, it is pointed out by farm experts. The sprouts, if harvested at the right time, represent an excellent fodder. According to Dr. Spangenberg, the cost of 220 pounds of sprouts produced from about fifty-five pounds of grain is little more than 20 cents.

Exhibit From Alberta

Involving an expenditure of \$5,000, an Alberta grain exhibit is planned for Regina World Grain Show. Hon. George Hoadley, Minister of Agriculture, said if the report Manitoba intended expending \$5,000 on a grain exhibit were correct, this province would take similar action.

WORLD HAPPENINGS BRIEFLY TOLD

The Salta Observatory reported that volcanoes in the central Chilean mountain region were moderately active, with indications of intense activity in the near future.

Prof. Albert Einstein, who renounced his German citizenship because of anti-semitism in Germany, has accepted an invitation to become a member of the faculty of University of Madrid.

The French naval air force was ordered to help maintain order along the frontier of Djibouti territory in French Somaliland, Africa, where several rebellious Abyssinian tribes threatened trouble.

The honor of being the first woman professor in Scotland has fallen on Miss Cecilia J. MacTaggart, of Glasgow, who has just been appointed to the chair of Biology in the Anderson College of Medicine, Glasgow.

Calgary school board will take court action against parents who keep their children from attending school in protest against the city reverting to the summer unemployment relief schedule.

Wyoming has lost a titled ranchman and England has gained an earl. Oliver Henry Wallop, 72, renounced his allegiance to the United States, placed his chaps in mothballs and became the Earl of Portsmouth, the 99th ranking peer of England.

Alberta will have only two district courts if an amendment to the District Courts Act, submitted to the legislature, is approved. At present, there is a district court in each of the 16 judicial districts of the province.

Poultry raisers in Western Canada are finding a market for their products in Great Britain. In the last two months of 1932, 1,500,000 pounds of fresh Saskatchewan and Manitoba turkeys were shipped to British markets.

Arthur Bierwagen, of Stettler, Alberta, has been awarded the Elizabeth Inrie memorial scholarship for 1933 at the University of Alberta. This entitles the holder to journey to Geneva for a summer course at the Zimmer School of International Affairs.

Argentine Delicacies

One Called "Palmito" Entails Cutting Down Palm Tree

The visit of the Argentine Mission to London has already had its influence on restaurants. Many are specializing in dishes and delicacies peculiar to South America. One of these is "palmito," an hors-d'oeuvre very popular with the Prince of Wales. He first tasted it in Buenos Aires three years ago. Its preparation entails cutting down a palm tree. The heart is then cut into cubes, soaked in oil, and served with lemon, anchovies, and sliced olives.

"What an appropriate-looking hot-dog stand!"

"Yes; it's made of dogwood and covered with bark."

YOUR LIVER'S MAKING YOU FEEL OUT OF SORTS

Wake up your Liver Bile

—No Calomel needed.

When you feel tired, depressed, sour on the world, that's your liver ailing. It's natural in the daily 100 pounds of liquids into your bowels. Digestion and elimination are being slowed up, food is accumulating and clogging inside you, and making you feel worse than, or more bored-overcome than, ails, oil, mineral water, laxative, or any of the usual "cures." You need a liver stimulant. Carter's Little Liver Pills are the best. They are gentle, pleasant, and do not harm. They are sold in all drug stores. Price 25c. at all drug stores.

A Cold Summer

Prediction That the Sun Will Show Less Heat For the Next Two Years

A prediction the sun will be colder for the next two years, with the possibility the earth will be affected in a way as yet unknown, was issued by Dr. Charles G. Abbot, secretary of the Smithsonian Institution.

Dr. Abbot already has had some success as a predictor of the sun's "weather." In 1930 he forecast two warm years on the sun, which in general has been fulfilled. Measurements have shown, "the sun has been giving out considerably more heat than normal since then."

Dr. Abbot's prediction is based on long study of periodical rises and falls in the sun's heat.

By Ruth Rogers

CHARMING DAY WEAR IN JUMPER MODEL—AFFECTS PRINCESS LINES

Loveliness for daughter or for mother.

Summer dresses are so smart! Of course you'll want this charming model, so youthfully charming.

It's carried out in navy blue crepe silk. The gumpie is maize plaid organdy. It's cunning the way it buttons down the back with tiny yellow ball buttons.

Pin tucks make the waistline fitting of the jumper. And incidentally, the jumper is a one-piece affair. Made in a jiffy!

A printed crepe silk would be effective for the jumper with the gumpie of plain toning crepe.

Style No. 554 is designed in sizes 14, 16, 18, 20 years, 36, 38 and 40 inches bust. Size 16 requires 2 1/2 yards 35 or 38-inch, with 1 1/2 yards 38-inch for blouse.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Powerful Flashlight FREE for POKER HANDS!

ONLY Four complete sets of poker hands will secure this handy flashlight (complete with batteries). Useful in the car or in the house and but one of the many valuable gifts given in exchange for Turret Poker Hands.

Sun ripened mellowness... extra satisfying flavour. That's the Quality you want in cigarette tobacco and that's the Quality you get in every package of Turret Fine Cut. And there's genuine economy too. You can roll at least 50 cigarettes from a 20¢ package.

It pays to "Roll Your Own" with **TURRET FINE CUT** CIGARETTE TOBACCO. SAVE THE POKER HANDS!

Barter Party Is Latest

Social Event Held Recently in Buffalo Proved a Success

Bartering has reached the stage of social function in Buffalo, not merely because adapting amusement to hard times is a fashion of the day, but also because there is fun in novel experiences.

The Currents Event Club, made up of women who hardly are in the economic stage which makes bartering necessary, has set the example with a barter party, and the members had such a good time that they voted to make it an annual event. The objects offered for barter were bracelets, necklaces, book ends, preserves, cakes use of automobiles, offers to sew and mend, orders for gasoline, bridge lessons and a multitude of other things representing the activities of the modern woman.

To Take Precautions

Parts Of Saskatchewan Threatened With Hopper Plague

Early precautions against the outbreak of a grasshopper plague in parts of Saskatchewan are urged upon farmers by officials of the department of agriculture.

Severe outbreaks of the plague are expected in southeastern Saskatchewan in the Estevan area, comprising a semi-circular tract of land including the towns of Torquay, Hantmon, Wilmar, Nottingham and Carnduff. The badly affected area also takes in a longitudinal strip up the centre of the province, starting in the south at Assiniboia and stretching far north in a narrow area to the southern boundary of Saskatchewan. Lesser areas are located at Neidpath, Piapot and Seppelt.

Protection For 'Planes

Ice Umbrella Will Shield Hub Of The Propeller

An ice umbrella for propeller hubs, a device said to overcome the last remaining ice peril for aeroplanes, was announced at Cornell University.

This umbrella shields the hub of the propeller.

The danger is not from the ice on or directly in front of the hub, but the danger is from the ice spreading in both directions outward along the whirling blades.

Has Bullet-Proof Car

Viscount Makoto Saito, Japan's elderly Premier, has bought a large armored American automobile. It is bullet proof against small weapons. The machine, costing \$6,000, is a closed limousine with bullet-proof glass. Threats against the Premier's life have been increasingly frequent. His two predecessors were assassinated by nationalists fanatics.

SUNDAY SCHOOL LESSON

APRIL 23

CHRIST APPEARS TO SIMON PETER

Golden Text: "Because I live, ye shall live also."—John 14:19.

Lessons: I Corinthians 15:1-8, 20-26. Devotional Reading: I Corinthians 15:51-58.

Explanations and Comments

The Historical Evidence Of The Resurrection Of Christ, verses 1-8.—"Now, brothers, I declare unto you the good tidings which I preached while I was with you at Corinth," Paul wrote his church there. The Corinthians were not in danger of denying Christianity, but of not accepting its true teachings as Paul had proclaimed them, and so he continued: "The good tidings which you received, to which you subscribe, if you remain true to my preaching—unless you believed in vain."

"If I believed in immortality as you believe in it, as you profess to do, I should live a far better life than you appear to live. I should strive more earnestly and bear more patiently. I do not think I should ever be troubled with a fear, or worried with an earthly burden. I think I would be all sunlight and joy if I believed as you do in eternal things—in resurrection and a life beyond in which all things will be made right."—Harriet Martineau.

Most important of all the good tidings which I declared unto you, which I was told (probably by Peter and James on his visit to Jerusalem recorded in Acts 9:27, 28), is that Christ died to atone for our sins according to the scriptures, that He was buried; and that He was raised on the third day.

Oh, vanguard grave of Jesus whose chill could work no change upon His heart! Oh, deep grave of Jesus whose depths can hide a whole world's sin!

Oh, glorious grave of Jesus through whose gloom lies the pathway to "Immortal Life!"—Ralph Connor.

That He appeared to Simon Peter (Luke 24:34); to the Twelve (Paul keeps the symbolical number, though Judas was dead); then to more than five hundred at once; (usually identified with Matthew 28:7, 16-20), some of whom are dead, but the greater number are still living (and you can have their direct testimony, if you wish). Then He appeared to James, the brother of Jesus (Acts 15:13; Gal. 1:19); then to all the apostles, just before the Ascension (Acts 1:4). And last of all, as to the child ultimately born, He appeared to me also, in the way to Damascus (Acts 9).

Celebrating Its Jubilee

Alexandra Club Was Started In London By Women

The Alexandra Club, oldest of women's clubs in London, is about to celebrate its jubilee. It was launched in a day when women of good social position could not stay at hotels unattended. The Alexandra Club was started by a bold band of pioneers, who were wricked by those restrictions. So carefully was it conducted that no man was allowed to enter the premises. To this day men are only tolerated at tea-time.

Disease-Resistant Wheats

Small Quantities Of Seed Are Now Made Available

Highly disease-resistant wheats have now been produced that are perfectly satisfactory from the standpoint of quality and agronomic behavior, the associate committees on field crop diseases announced at the conclusion of its fifth annual meeting in the Dominion Rust Research Laboratory in Winnipeg, Dr. C. H. Goulden, of the laboratory, presented the report.

"It seems that out of 33 strains in the co-operative tests of 1932 at least six are suitable for distribution to farmers, but only small quantities of seed are available at present, and it will take two seasons to increase the quantity available to the required point," the statement read. "In the meantime, commercial milling tests will be made on the strains selected and further field tests, with a view to reducing their number to two or three adapted to the varying conditions to be found in the wheat-growing areas."

"Every effort will be made from now on to increase the seed of these wheats as rapidly as possible."

Sharing Large Houses

Fashion Introduced In London By Duke Of Connaught

In these hard-up times people in London are trying to solve the problem of being saddled with houses too large for them by dividing them into family flats. Instead of young married couples taking small houses in Chelsea or elsewhere, they install themselves in part of the parental home with separate housekeeping of their own. The idea was started by the Duke of Connaught, who gave Lady Patricia Ramsay, an "apartment" in Clarence House when she married.

Made Success Of Hobby

A striking record was made by Constable Carl P. Walden, of Stockholm. He recovered 21,000 lost or stolen bicycles in his thirty-two years of service. He has just retired on a pension. Finding missing wheels was a hobby with Walden.

BABY'S COLDS

Never "dose" except on doctor's advice

HITLER APPOINTS NAZI LEADERS AS GOVERNORS

Berlin, Germany.—Chancellor Adolf Hitler has added the post of governor of Prussia to his duties and immediately appointed Hermann Wilhelm Goering, one of the principal Nazi leaders and minister without portfolio in the federal cabinet, to serve as premier of the state.

The Hitler appointment as governor was approved by the cabinet, which also named General Franz von Epp, another Nazi, to serve as governor of Bavaria. The general has been acting as federal commissioner for that state.

Captain Goering, who is in Rome at present, is expected to present his Prussian cabinet list to the chancellor when he returns.

German scientists were angry about a letter written by Professor Albert Einstein from Belgium to the Prussian Academy of Sciences. In this letter, dated April 5, Professor Einstein described present day Germany as being "in a state of mass psychosis."

A report from Cologne said the Rhineland and Westphalian sections of the German People's party, which was founded by Dr. Gustav Stresemann, has decided to disband and urge its members to join the Nazi party. This was believed to spell the doom of the party, whose national executive committee will meet May 7.

The government published a law under which the terms of lay judges and jurymen will expire June 30, 1933, instead of ending normally December 31, 1934.

This means the ousting of both panels of Jews and Communists, and presumably also Socialists.

The same law prescribes the expiration on June 30 of the terms of office of all commerce courts judges.

An official denial was given here to reports in the Stockholm newspaper Social-Demokraten, which said that 247 persons, including 17 Nazis, 14 Jews and 216 Communists and Socialists had been slain in Germany from the time of the rechristening, February 27, until March 25.

The denial says: "The total political slain in March was not one-third thereof."

Mounties For Saskatoon

Unit of Thirty-Five Sent From Training School At Regina

Saskatoon.—Thirty-five mounted R.C.M.P. men arrived by train from the training school at Regina, headquarters for Saskatchewan.

Under the command of Inspector L. J. Sampson, there are two corporals and 32 men in the group. All have horses, brought here in three horse cars over the Canadian Pacific Railway.

According to an official statement the Mounties were brought here to complete their training by mounted patrol work in districts tributary to Saskatoon. All the men have been billeted in a local hotel and their mounts have been stabled in a west side barn. Non-commissioned officers among the new arrivals are Corporals J. Helliott and P. Cleary.

British Exports

Trade Figures Show Evidence Of Business Revival

London, Eng.—An improvement in British exports for March is announced.

Preliminary board of trade figures gave the March export total as £32,551,000, as compared with £27,928,000 for February, and £31,196,000 for March last year.

Imports show £56,344,000, as compared with £49,077,000 in February and £61,181,000 in March, 1932.

Death Of Scientist

Lausanne.—Jules Piccard, father of Dr. Auguste Piccard, explorer of the stratosphere, died here at the age of 63. He was a professor of chemistry in the University of Basel 40 years and was widely known for his scientific works.

W. N. U. 1900

Akron Naval Inquiry

Evidence Indicates That Mammoth Dirigible Broke In Mid-Air

Laurel, N.J.—A picture of the mammoth dirigible Akron dropping through darkness with its bow up at an angle of 35 degrees and hitting the water with a crash. The ship was given the United States naval court of inquiry here.

With the picturesque words of a sailor, Moody Erwin, aviation metallurgist second class, told the story of the flight that cost 73 lives. Erwin was one of three survivors of the disaster.

Erwin, joined Richard E. Deal, boatswain, in telling of the breaking of longitudinal girders and the steep incline of the ill-fated airship following what both described as a terrific "gust of wind."

Both, too, testified the first break in the structure of the ship occurred in the air following the gust they described, whereas Lieutenant-Commander H. V. Wiley, the third survivor, or changing his opinion, said the ship's framework did not break until the Akron struck the water. The break described by the two enlisted men was in longitudinal girders, on the right hand side, midway between the bottom and top.

Curb Reckless Skiing

More Stringent Regulations In Mountain Areas Are Recommended

Banff, Alberta.—Curbbing of reckless skiing in mountain areas was sought as a consequence of the inquiry into the death of Dr. R. E. C. Paley, English scientist, who was killed as he fell from Possil mountain while skiing over prohibited area.

A coroner's jury concluded its work with the finding Dr. Paley came to his death through misadventure while trying to traverse a steep snow slope on Possil mountain. It added a rider the federal parks department draft stringent regulations governing ski expeditions from all camps.

What action would be taken to safeguard skiers within park limits was unknown here. Regulations barring skiers from certain dangerous areas are now in force and all skiers are warned of the prohibited areas by club officials on arrival at the camps. It was expected the department at Ottawa would obtain recommendations from the numerous ski clubs with a view to implementing local regulations.

Calgary Mill Rate

Property Tax For 1933 Set At Fifty Mills

Calgary, Alberta.—City council last night approved a property tax rate of 50 mills and asked the commissioners to redraft 1933 estimates on this basis.

Previously Mayor Davidson feared the mill rate would be set at 25, the highest in the city's history, but council last night instructed the commissioners to lower the rate by one mill compared with last year.

Letter Of Forgiveness

Toronto, Ont.—In behalf of a group of Toronto clergy, a letter of forgiveness has been sent to John A. Macchray at Stony Mountain penitentiary, to which he was sentenced to seven years for theft of funds from the University of Manitoba. Rev. H. F. Woodcock said the Oxford group had brought a "change of heart" to himself and fellow clergy, and it was decided to send a letter of forgiveness to Macchray for the loss of church funds in his custody.

An Old Theory

Washington.—Cordell Hull, United States Secretary of State, considered as antiquated, obsolete and bewildering the theory that a moderation of tariffs would foud the United States with the products of cheap foreign labor and drive down the U.S. standard of living.

Duties Against Cattle From Ireland

London, Eng.—A new scale of specific duties for live cattle for food imported from the Irish Free State was imposed by a treasury order. In future such cattle, instead of paying 10 per cent ad valorem per head, will be divided into five classes.

ATTACKS SOVIET BILL

Sir Stafford Cripps, former Solicitor-General in the MacDonald Socialist Government, who declared himself opposed to the emergency bill passed by the British House, which gave wide powers to deal with the Soviet in the event that the forthcoming trial of six British subjects did not end satisfactorily. The bill received its third reading with a large majority.

No War Pension Reduction

To Effect Desired Economies Without Disrupting Present System

Ottawa, Ont.—No reduction in war pensions, but enactment of legislation which would effect desired economies without disrupting the present pension situation is under consideration by the government. Proposals that the income tax be applied to pensions and that, after a definite "deadline," no more dependents be added to the pensions list have replaced the government's move to suspend payment of pension to war-pensioners in the civil service.

The new plan is understood to have the approval of representatives of the Associated Veterans now in conference here. According to the service men, the chief merit of the new economy lies in the fact that it will not effect existing pensioners, or at all events only those whose income is sufficiently large to bring them under the operations of the income tax. The small-salaried pensioners would not be disturbed.

Reindeer Trek Almost Ended

Ottawa, Ont.—The long trek of Canada's reindeer herd from western Alaska to the Mackenzie River delta is nearly ended. Hon. T. G. Murphy, minister of the interior, said recently the herd, which has been travelling since December, 1929, has arrived at the west bank of the Mackenzie River at the delta where it flows into the Arctic ocean.

Horse Breeders' Subsidy

Bonus To Assist Farm Horse Industry In Saskatchewan

Ottawa, Ont.—A bonus to owners of stallions in the province of Saskatchewan in which the Dominion and provincial governments will co-operate on a 50-50 basis was announced by Hon. Robert Weir, Minister of Agriculture.

The scarcity of good stallions in the prairie provinces and the shift by farmers from motor traction to the use of horses has made it necessary to assist the horse-breeding industry.

Because of conditions in the west with low grain prices many farmers found it difficult to finance the operations of tractors and in the spring of 1932 various horse breeders of the three prairie provinces approached Mr. Weir urging him to give to stallions which passed federal inspection.

"Each department agrees to pay 50 per cent. of grants to clubs formed this year," under the federal club policy. They also agree to pay premiums to owners of all stallions which are not clubbed but that passed inspection by federal inspectors in 1932, and those that pass federal inspection this year," the statement reads.

The Soo Dominion

New Train To Operate Between Chicago and Vancouver

Chicago.—Co-ordination of railway services to the west to eliminate duplication will be undertaken with inauguration June 1 of the "Soo Dominion," a train to travel over the Chicago and Northwestern Railway, the Soo Line and the Canadian Pacific.

The train is intended to serve the Canadian Rockies region between Chicago and Vancouver.

R. Thomson, passenger traffic manager of the Northwestern road, said the co-ordination of train service between the Soo line and the Northwestern was "new to this region and is expected to prove beneficial to both roads."

The train will operate over the Chicago and Northwestern to St. Paul, over the Soo line to Port Huron, N.D., where it will be delivered to the Canadian Pacific, Thomson said.

Chicago Teachers Parade

Chicago.—Chanting "We want cash!" more than 1,000 demonstrators paraded through the Loop here in protest of non-payment of school teachers, stormed the offices of the board of education, and smashed their way through a door before seeing Orville Taylor, board president. The city owes teachers some \$28,000 in back pay.

INDIA WILL END TRADE TREATY WITH JAPAN

New Delhi, India.—The government of India announced steps had been taken to end the trade convention with Japan signed in 1905. The government has given Japan six months' notice of termination of the "most favored nation" clause of the convention.

Removal of Japan from the list of nations enjoying "most favored nation" treatment in the Indian customs tariff schedules is a protective measure to offset dumping, it was explained by Sir Joseph Bhore, commerce member of the viceroy's executive council.

The announcement was made while the legislative assembly was discussing Sir Joseph's motion for consideration of an anti-dumping bill.

The minister explained abrogation of the treaty with Japan was intended to offset the effect of special conditions such as Japan's depreciated currency, and other factors which resulted in the dumping of goods in this country at abnormally low rates.

India's greatest customer in recent years for her cotton has been Japan, but this is exported in the natural state and a great part of it is re-imported in cotton piece goods. Japan has gradually increased her advantage over the United Kingdom in selling cotton piece goods to India.

H.B. Co. Report

Improvement Is Shown Over Last Year In Annual Statement

London, Eng.—Substantial improvement over last year is shown in the annual report of the Hudson's Bay Company, Limited, for the year ended January 31, although a trading loss of £225,324 is reported after the allocation of £199,381 to depreciation.

Appropriate provision has been made for losses in respect of investments and also against stock values. In addition, the report states, £106,297 has been provided against losses on sales and the disposal of properties. It has been decided to release properties which have become superfluous, although such sales may involve a book loss. Some of these properties were sold during the current year. Provision has, therefore, been made for the losses incurred and a reserve set up against further anticipated losses in this connection.

Currency Depreciation

Secretary For Dominions Refers To Situation In Australia and New Zealand

London, Eng.—J. H. Thomas, Secretary for the Dominions, told the House of Commons he does not think the depreciation of the Australian and New Zealand currencies were deliberate breaches of the agreements signed at Ottawa during the Imperial Economic Conference. Mr. Thomas said he did not think the question appropriate for the British government to make representations on. It was suggested it was done to help trade of those countries.

Alberta House Prorogues

Close Of Third Session Of Seventh Legislature

Edmonton, Alberta.—After putting 65 new acts on the statute books of this province, the provincial legislature was prorogued April 11th, by Hon. W. L. Walsh, Lieutenant-Governor.

The speech of his honor brought to a close the third session of the seventh legislature of Alberta which opened on February 9, just over two months ago.

Demand New Trial

New York.—The International Labor Defense League announced petitions to be presented to President Roosevelt would be nationally circulated demanding a new trial for Heywood Patterson, convicted at Decatur, Ala., in "the Scottsboro case." Patterson said he expected 1,000,000 signatures to the petitions within a week.

AKRON SURVIVORS IN WASHINGTON

Claude Swanson, United States Secretary of the Navy, is pictured as he congratulated Lieutenant-Commander Herbert Wiley and his two fellow survivors, Richard E. Deal and Moody Erwin (background), on their narrow escape from death in the Akron disaster. The men flew from New York to Washington to give their official version of the catastrophe. They were referred to by Secretary Swanson as "members of as gallant a crew as ever served in the United States Navy."

Eating Tobacco, for Sheep

Market Examiner: There was a
more or less serious reference in
this paper recently, in which a
Lethbridge man said he was pre-
paring to feed his pigs a mash that
had a strong alcoholic kick to it.
Now there comes from the Domini-
on Dept. of Agriculture an article
which says we should learn our
sheep to use tobacco.

All the old shepherds used to
mix tar with the salt, and the do-
partment says there are other pro-
ducts which if mixed with salt will
help to prevent parasitism in the
flock. Ten pounds of crushed to-
bacco leaf mixed with 100 pounds
of salt and exposed regularly to
the sheep will keep down the num-
ber of stomach and intestinal para-
sites. If the sheep are not used to
tobacco start off with a smaller
amount of the weed, or mix a little
wheat bran or crushed oats.

The above may be all right for
the East, but The Examiner man
knows a lot of cute little Western
bucks, as well as some of the old
bucks, that will adhere to their
preference for cigarettes, in order to
keep their good health.

A Great Educational Activity

The educational value of such a
gigantic undertaking as the
World's Grain Exhibition and Con-
ference which opens at Regina
(Canada) in July next is already
beginning to receive practical rec-
ognition among educational men.

At a meeting of the school in-
spectors of the Province of Mani-
toba a few days ago a resolution
was unanimously accepted in which
the inspectors expressed their rec-
ognition of the value of the Ex-
hibition and Conference as a prac-
tical, educational activity and auth-
orized the executive to make nec-
essary preparation for the attend-
ance in a body. Information is also
requested from the Exhibition and
Conference organization sufficient
to form the basis of educational
talk to the pupils of the provinces.

This action of the school in-
spectors of Manitoba, with the action
of the school trustee convention in
Saskatchewan, at which the Ex-
hibition and Conference was rec-
ognized in much the same man-
ner, is significant of the interest
taken by those who have charge of
the education of the younger gen-
eration.

Would You

Like to Know—

(by Val M. Kotcherofski.)

That since 1800 there have been
assassinated 3 czars and the
family of Czar Nicholas II of
Russia, 4 kings, 8 presidents, 3
princes, 1 sultan, 1 shah, 8 pre-
miers, 1 empress, 1 queen, 1
governor, 1 governor-general, 1
vice-president, 1 general, 1 grand
duke, 1 archduke and wife.
That 1 pound of radium is val-
ued at \$3,000,000.

That the Amazon, in Brazil, is
the largest river in the world—
draining about 2,300,000 square
miles.

The Motorist's Anthem.

My flivver, 'tis of thee,
Short cut to poverty;
Of thee I chant,
I blew a pile of dough
On thee nine months ago
And now you will not go,
Or won't, or can't.

Farm Ownership of Radio.

The value of boosting the sale
of goods to farmers by the radio
broadcast is an open question since
Dominion Government returns of
the 1931 census show that less
than 20 per cent of the farm homes
in the four western provinces had
a radio set of any kind.

Returns show that there were
only 60,856 radio sets in the 314,
158 farms homes in Manitoba,
Sask., Alberta and B.C. The fig-
ures for per cent ownership of
radio sets by provinces are—B.C.
23, Alberta 17, Sask. 20, Man. 18.
It should be noted, too, that these
figures are not for "licenses" but
for actual ownership of sets as
reported by the census.

This means that if every owner
of a set on farms can get the ad-
vertiser's program (which is never
the case) and does listen in on the
air which is even wider of the
mark than at the maximum the
advertiser can at the best only
hope to reach less than 20 p.c.
of the farm homes in the 4 Western
provinces.

School Lands Leases.

During the past year and a half
many holders of school land sales
contracts with the provincial Dept.
of Lands have voluntarily relin-
quished their contracts, and have
entered into lease arrangements
covering a period of 6 years. These
arrangements, made in anticipa-
tion of better conditions than at
present prevail, are likely to prove
in the immediate future too oner-
ous for the lessees. Holders of these
leases will be given an opportunity
to obtain cultivation permits, pay-
ing to the Dept. of Lands a cash
rental of 4c an acre for the land
cultivated; and a permit fee of \$1
and a share of crop grown on land
in 1933.

Settlers who make such arrange-
ments with the Dept. and comply
with the terms, will have priority
rights for a 1934 renewal, and at
the expiration of that season, set-
tlers will have 1st right to lease the
land.

"Jock's" Extravagance.

The depression must be over—
It is reported that "Jock" Mc-
Niell, proprietor of the McNiell
taxi cab service of Edmonton, cal-
led one of his own taxis and paid
his fare home, tipping the driver
very liberally.—Thorsby stems in
Leduc Representative.

Too Biased.

"Why don't you like those
girls?" asked one young fellow of
another, at the show on Monday
night.

"Oh!" was the reply, "they are
too biased."

"What do you mean 'biased'?"
the other asked.

"Oh, bias this and bias that—
until I'm busted," was the reply.

Notice to Creditors and Claimants.

IN THE ESTATE OF MARGARET
FITZPATRICK, late of the Dis-
trict of Stony Plain, in the Pro-
vince of Alberta, deceased.

NOTICE IS HEREBY GIVEN that
all persons having claim upon the
Estate of the above named Margaret
Fitzpatrick, who died on the 2d day
of April, 1933, are required to file
with the Solicitor for the Execu-
tors by the twentieth day of May,
1933, a full statement duly ver-
ified of their claims and of any
security held by them, and that
after that date the Executors will
distribute the assets of the deced-
ed among the parties entitled
thereto, having regard only to the
claims of which notice has been so
filed or which have been brought to
their knowledge.

DATED this 12th day of April,
1933.

GEORGE J. BRYAN,
Solicitor for the Executors.

News of Rosenthal.

Geo Kulak returned on the 12th with his p.b black Percheron stud, purchased from J. Normandeau, Grouville, Count de Frontenac 19303, foaled June 4, 1927, sired by Prince Salem 12113. Mr P.R. Talbot of Livestock Dept. places this animal as the best in Alberta. This horse, known as Prince, won Grand Championship, Edmonton, 1931; he weighs 2100. Those wishing to raise good colts should not hesitate to see Mr Kulak at once.

Mr Alex Johnson of Edmonton Beach dairy farm, has moved his belongings to his new location north of Duf field, where he intends to go into the "cow-ry" business.

An awful roar and howling was heard out here at Rosenthal just previous to Easter. Some blamed it on the clarinet, but upon investigation found it was only Kotscherof

sky boys cranking the hibernation out of their old Henry car.

Merry Christmas and New Year greetings were passed between friends here Easter Monday, at the athletic club's whist and huddle drive.

Despite Eskimo weather, a fair crowd turned up to support the "haymaker's" club.

The winners were: Whist, men; Edw Kulak 1, P Kulak 2; ladies, Clara Kotscherofsky 1, Mrs Ph Kulak 2.

Hullie, men, Art Froisher 1, Ted Ziegman 2; ladies, Mrs Otto Kotscherofsky 1, Mrs J J Kulak 2.

Tennis Notice.

With the event of the coming spring there arises in the minds of tennis enthusiasts a question as to when the tennis season will again be open. It is with regret that the committee give notice that unless there be a prompt response from everyone wishing to play, this branch of sporting activity may have to be discontinued.

May this article impress the fact upon the minds of every one that the fees here are the lowest in Alberta, and that the courts may be kept in good condition with the existing low fees only providing that every one procures a ticket.

It is the wish of the committee that this matter be given serious consideration. The courts are there for our use, and it would be a mistake to neglect them.

Watch The Sun for further notices.

L. G. Sieber Graduates.

At the annual convocation in the College assembly hall at St. Stephen's College, last week, a minister-to-be of the United Church was graduated in the person of Mr Lawrence G Sieber. His ordination and reception into the ministry will take place at the Annual Conference to be held in Calgary next month. The newly-made minister is a nephew to the Rev W E Sieber, of the local United Church, and has made frequent visits to Stony Plain.

Obituary

The death occurred in Stony Plain on Thursday, April 13, of the 18-month-old son of Mr and Mrs S Paulsen, of Fawcett. The funeral took place on Saturday at Fawcett.

Mrs Paulsen had been visiting in Stony Plain with her sister Mrs John Reiser at the time the infant passed away.

Mr John Armbruster has charge of the funeral arrangements.

Funeral of H. T. Walton

The funeral of the late H T Walton took place Saturday, when a very large number of the neighbors and friends followed the remains to their last resting place.

Services were conducted at the residence by the Rev W E Sieber, pastor of United Church, Stony Plain.

The pallbearers were: Geo. Rehkopf, C R Propp, George Lipbert, John Evjen, W M Wastburn, R B Brunet.

Interment was made at the Inga cemetery, the services there being conducted by Pastor Sieber.

He is survived by his wife; two sons—John, of Brightbank, and Bert, in California; 4 daughters—Mrs Allen, Bright bank; Mrs A Propp, Holborn; Miss Dorothy Walton, Stony Plain; Mrs John Hinkel, Mewasin.

Howard & McBride, funeral service.

Card of Thanks.

Mrs H T Walton and Family wish to express their sincere thanks to all who so kindly assisted them during their recent bereavement and also for the floral tributes received.

John Armbruster,
Funeral Director,
Stony Plain, :: Alberta.
Efficient Service.

Stony Plain and District

Mrs John Eberhardt and children, of Edison, spent the week end with relatives in this district.

Miss Millie Schulz of Vancouver is visiting in Stony Plain with Mr and Mrs O G Wudel.

Mr and Mrs Val Pailer Jr., of Brookdale, spent the week end in Stony Plain.

Mr and Mrs Carl Peterson are leaving Mackay to take up their residence at Stony Plain.—Mackay item in the Edison Signal.

Mr Joe Mayer and Mr Ed Sommerfield were present on Tuesday evening at the banquet at the Macdonald, given by officials of General Motors to their agents.

Stony's Public and High schools will re open Monday next.

Stony Plain is to have another landmark on Main St., as it is intended to erect gas and oil pumps "at Egbert Hall.

Mr J A Barrie has taken up his residence at Edmonton Beach, and is getting the place in shape for the opening next month.

There was a big attendance on Sunday morning at St Philip's church, when Rev M Sarrasin, of the Franciscan Order, Edmonton, sang the Mass.

BUTTER AND EGGS WANTED at The Royal Cafe.

News of "The Corporal."

"We understand Corporal Moses has been given a change of location. We are sorry to lose so popular an officer," says The Athabasca Echo, "but the work here has been of a very strenuous character, and he feels he would appreciate a change which, he says, is 'as good as a rest.' The huge and difficult country covered by the local unit is far too much for one man and three would not be too many to properly take care of the work."

T. C. M. Midsummer Exams.

The Toronto Conservatory of Music announces that the Midsummer Local Examinations for 1933 will be held thruout Canada in May, June and July next. Applications and fees from candidates west of the "Soo" should reach the Conservatory not later than May 1.

Great West Takes Over Oil Consumers Co-op.

Great West Distributors have taken over the operation of the plants of Alberta Oil Consumers Co-op. at all the points in Alberta. U. F. A members doing business at the points affected should give their name and the name of their local for record on the invoice, so that they may receive patronage dividend thru U.F.A. Co-op. Ass'n or thru the U. F. A. Central Office. Shareholders of Oil Consumers Co-op. will receive their dividends in future direct from Great West Distributors in Calgary.

Peck's CAPS

—are made for those men and young men who appreciate the little touch of refinement in head dress.

The most comfortable and most serviceable caps made for golf, motoring and all outing occasions, as well as about wear.

T. J. Hardwick, Agent.
Stony Plain

Elephant Brand FERTILIZER.

Prices for 1933 are as follows:

AMMONIUM PHOSPHATE,
\$58.30 per ton, cash, off car.

TRIPLE SUPER PHOSPHATE,
\$45.00 per ton, cash, off car.

Time prices slightly higher.

Cost per acre runs from 70c.—\$1.20.

Fertilizer attachments are now handled by the I.H.C. Massey Harris, John Deere, and Cock-hat for the newer models of their own drills. The Consolidated Mining & Smelting Co. make attachments for all drills, new or old, at \$3.50 per run, less 5 per cent for cash

Orders should be in soon, to get advantage of car-load rate.
